

Junction Solutions
Where Platform Meets Inspiration

Microsoft Dynamics Senior Implementation Consultants

Location: United Kingdom

Junction Solutions continues to experience strong growth and is currently hiring full-time **Senior Consultants** with prior ERP implementation experience.

Junction Solutions, a Microsoft Gold Certified Partner, is the premier provider of vertical industry focused enterprise software and services based on Microsoft Dynamics AX. Focused on providing innovative solutions for food and beverage, multi-channel retail, and wholesale distribution, Junction Solutions combines deep industry expertise with Microsoft Dynamics AX (Axapta), the most technically advanced ERP platform in the industry. Through deep industry skills and technology alliances, Junction Solutions delivers innovations that help clients transform their business operations and better connect with their customers, business partners, and employees. We are a growing and dynamic business and technology consulting firm that works with mid-market and divisions of Fortune 1000 firms.

Senior Implementation Consultants are responsible for working on our client implementations. This role may begin or evolve into a position with extensive travel to client sites. You will be responsible for all phases of the project lifecycle, including: planning, installation, implementation, deployment, and support. Duties will include:

- Requirement gathering
- Installation, configuration, and custom modification of Microsoft Dynamics
- Security setup, report configuration, and data conversion
- Testing, debugging, updating, and maintenance activities
- Supervision and mentoring junior consultants
- Client support

Senior Technical Consultants should have a background or degree in Computer Engineering or a related field. In addition 2-5 years experience implementing, and developing, Dynamics AX ERP systems is required. The candidate needs to be Microsoft certified in development of Dynamics AX. Dynamics AX Technical Masters Certification is a plus. They must have software development experience including tools from the list below:

- .Net
- ASP
- C#
- SQL Server Database
- Java
- X++
- Oracle Database
- C++

Senior Function Consultants should have a background or degree in Accounting, Finance, Operations, Supply Chain, or other business related field. Experience or a degree focus in our vertical industries is a plus. 2-5 years experience implementing Dynamics AX ERP, or similar ERP, systems is required with Dynamics AX certification a strong plus. In addition, Senior Functional Consultants must have a technical competence and experience in software development.

All candidates must be client focused, team orientated, and have superior communication skills.

At Junction Solutions our product is our people. You'll be part of a team of smart, engaging, client-centric professionals who understand that our success depends on the measurable success of those we serve. You'll find an opportunity to balance personal life with professional growth in an environment that rewards creative problem solving. We believe that great people, all focused on a shared and powerful vision, can achieve tremendous results. There's a real sense of empowerment when you know your contribution really matters.

These are full time salaried positions with full company benefits. Junction Solutions offers a comprehensive benefits package including private medical and pension.
