Junction Solutions Releases a Stand-Alone Direct Store Delivery (DSD) Solution For Microsoft Dynamics AX

Junction Solutions' DSD Provides Real-Time, Enterprise-Wide Visibility for Food and Beverage, CPG and Distribution Companies

LINCOLNSHIRE, IL — Chicago-based Junction Solutions (www.junctionsolutions.com), a provider of vertical market-specific software applications and services for the Food and Beverage, Multi-Channel Retail and Distribution industries, has released a Direct Store Delivery application for Microsoft Dynamics AX. Offered in an on-demand or on-premise version, the independent Junction Solutions' Direct Store Delivery (DSD) solution was created to specifically address key issues facing Food and Beverage, CPG and Non-durable Goods businesses that deal with highly regulated, complex routing or dynamic demand volume distribution requirements.

Junction Solutions' DSD gives companies the ability to quickly, accurately and reliably deliver goods, manage inventory and track products from dispatch to onsite delivery to end-of-day route reconciliation. The solution is native in Microsoft Dynamics® AX and is available as an independent application to any Dynamics AX customer, whether or not they currently utilize Junction Solutions' product suite.

"Junction Solutions' DSD solution suite offers multiple advantages to Dynamics AX users. The new on-demand version is extremely cost-effective since IT hardware support and software maintenance costs are reduced. For Dynamics AX users, the solution is exceptionally quick and easy to implement, and the speed of adoption is fast since they are already familiar with the environment," said Christian Hutter, vice president of food and beverage, Junction Solutions.

"In addition, companies can choose their preferred mix of mobile devices to meet their specific route requirements. With Junction Solutions' DSD, customers are able to better manage inventory, load, route, and delivery information, while providing full visibility to all of the key players in the process flow, from the customer service representative to the delivery truck driver. Finally, the solution is fully integrated into Dynamics AX with accounts payable, receivables and general ledger information, so no additional integration is needed," Hutter added.

“This solution compartmentalizes core functionality and offers multiple deployment options. As a Microsoft Dynamics ISV (independent software vendor) and one of the leading Microsoft Distribution Industry partners, Junction Solutions has once again demonstrated its commitment to deliver innovative, cost-effective and flexible technology solutions specific to the manufacturing and distribution industries,” said Michael Shoemaker, Microsoft’s U.S. Distribution Industry market development manager. “Junction Solutions’ DSD provides customers with crucial information without having to leave their familiar Microsoft Dynamics AX environment.”
